

AMITY INSTITUTE OF INFORMATION TECHNOLOGY
AMITY UNIVERSITY UTTAR PRADESH

Organizes

2018 7th International Conference on Reliability,
Infocom Technologies and Optimization (ICRITO)

(Trends and Future Directions)

Prof. / Dr. / Ms. / Mr. *Misa Zivessa*
of... **INSTITUT TEKNOLOGI DAN BISNIS KALBE - INDONESIA**.....

has participated in the 2018 International Conference on Reliability, Infocom Technologies and Optimization (ICRITO)
(Trends and Future Directions) during August 29-31, at Amity University, Noida, Uttar Pradesh.

He/She also chaired/co-chaired a session / delivered a keynote address/invited talk/ presented a paper titled
Saving... And... Loan Information System of... Cempaka Cooperative Web Based........

Founder President's Message

I am delighted to know that Amity Institute of Information Technology (AIIT), Noida is organizing **7th International Conference on Reliability, Infocom Technologies and Optimization (ICRITO'2018)** from Wednesday, the 29th August to Friday, the 31st August 2018 at Amity University Uttar Pradesh (AUUP).

The theme of the Conference is extremely important and after going through the program in all details, I find that very few Conferences make the base for knowledge dissemination and provide such further visionary thought-provoking ideas, which offer unlimited scope of further research and innovation as this Conference. The themes to be deliberated during the conference are of extreme relevance to today's development in the conference areas. Each theme has a very special significance, just name the few: Quality and Reliability, Mathematical Modelling & Optimization, Networks, Communications and Cyber Security, Software Engineering, Internet-Of-Things, Artificial Intelligence and Experts Systems, Natural Language Processing, Mobile Computing, Safety and Risk Analysis.

I appreciate the support provided by IEEE UP Section & Indian Space Research Organization (ISRO) to AIIT in organizing this great event at Amity University Uttar Pradesh (AUUP). My compliment to Universidad Nacional de La Pama (UNLPam), Argentina; St. Petersburg Polytechnic University, St. Petersburg, Russia; Daffodil International University, Bangladesh; Divsar (R&D Organization), Argentina; IETE, India and Society for Reliability, Engineering, Quality and Operations Management (SREQOM), India for being the Knowledge Partners of the Conference.

The presence of several distinguished speakers and worthy participants from overseas and India will immensely enhance the value of this event and they would be able to establish significant and long-term contacts, forging bonds and mutual cooperation between Amity University and several participating universities, institutions and organizations, particularly from countries like USA, China, Germany, UK, Australia, Japan, South Africa, UAE, South Korea, Argentina, Malaysia, Oman, Turkey, Jordan, Indonesia, Morocco, Sri Lanka, Slovak Republic, Malta and Bangladesh.

I am confident that the Conference would be highly outcome-based and greatly result-oriented & would provide further vision for future. I extend a very cordial welcome to all worthy participants and wish them fruitful deliberation and also a pleasant stay.

My hearty compliments and appreciation for Prof. Sunil Kumar Khatri, General Chair & Director, Amity Institute of information Technology (AIIT), AUUP along with his dedicated Organizing Core Team for all the hard work put in by them and also I appreciate the full involvement of all faculty members, PhD Fellows, students and staff in ensuring the success of the Conference.

I wish the Conference a grand success.

(Dr. Ashok K. Chauhan)

President, Amity Institute of Information Technology (AIIT) &
Founder President
Ritnand Balved Education Foundation (RBEF)
(The Foundation of Amity Institutions and the
Sponsoring Body of Amity Universities)

Chancellor's Message

Dr. Atul Chauhan

President, Ritnand Balved Education Foundation
Chancellor, Amity University UP

MESSAGE

The IEEE 7th International Conference on Reliability, Infocom Technologies and Optimization (ICRITO'2018) organized by Amity Institute of Information Technology (AIIT), AUUP aims to explore growing advancements in the fields of Reliability and Quality, AI, Networks and Communications, IoT, NLP, Mobile Computing, Software Engineering, Safety and Risk Analysis & Mathematical Modelling & Optimization. We thank the IEEE UP Section for technically sponsoring & Indian Space Research Organization (ISRO) and Defence Research and Development Organization (DRDO) for supporting AIIT in organizing this great event at Amity University.

I am sure that this conference will provide an interactive platform to all the participants to widen their knowledge domain and to explore and exchange new ideas, techniques and models in the area of Reliability, Infocom Technologies and Optimization.

I welcome all the delegates and speakers from all over the world at Amity University participating in the conference. I commend the remarkable efforts of the Conference Team to organize this conference at international level. My congratulations to Dr. Sunil Kumar Khatri and the Organizing Team for the efforts put for conduct of the conference.

Dr. Atul Chauhan

Patron's Message

Prof. (Dr.) Balvinder Shukla
Professor of Entrepreneurship & Leadership
Vice Chancellor, Amity University Uttar Pradesh

MESSAGE

Riding on the success of its past conferences over several unique themes and critical acclaim, I am immensely ecstatic to inform you that Amity Institute of Information Technology (AIIT) in association with Computer Society of India (CSI) and IEEE, is organising 7th International Conference on “Reliability, Infocom Technologies and Optimization (ICRITO’ 2018) on the theme ‘Trends and Future Directions’ from August 29-31, 2018 at Amity University Noida Campus.

This conference will provide a unique platform to researchers, academicians, industry experts, young professionals, scholars etc., to widen their knowledge domain, explore and exchange new ideas, provide different insights and deliberate on various significant topics of today’s competitive world such as Quality and Reliability, Mathematical Modelling & Optimization, Networks, Communications and Cyber Security, Software Engineering, Internet-Of-Things, Artificial Intelligence and Experts Systems, Natural Language Processing, Mobile Computing, Safety, Risk Analysis etc.

I am happy to share that the Call for papers on these relevant topics had an overwhelming response. I convey my heartfelt gratitude to all the distinguished researchers, academicians and industry experts from various reputed Universities and research organizations from India and abroad such as DRDO, ISRO, BARC, NDA, CSIO, SL, NPTI, IITs (Kanpur, Banaras, Jharkhand and Mandi), IITM Gwalior, IIM Lucknow, NITs (Delhi, Karnataka, Calicut, Silchar, AP and Durgapur), JNU, JMI, DTU, IGDTUW, GBU, RTU, PU, AU, CU, Amrita and VIT for their meaningful contributions.

Further, this Conference will also bring together the renowned experts from the core field and other allied areas to forge linkages and bonds for mutual research benefits. The sessions during the Conference will be informative, interactive and valuable to all the participants and surely they will benefit immensely from the in-depth knowledge and experience of eminent speakers from all over the world.

I congratulate AIIT Organising team for their remarkable efforts for organising such Conferences. It is only through such dedication and perseverance that one can achieve excellence.

I take this excellent opportunity to convey my best wishes to all the delegates, speakers and researchers from all over the world and wish them a great learning experience as well as a pleasant stay in Delhi NCR.

Wishing ICRITO’2018 a grand success!

Prof. (Dr.) Balvinder Shukla

MESSAGE

It gives me immense pleasure to know that Amity Institute of Information Technology is organizing 7th International Conference on Reliability, Infocon Technology and optimization (ICRITO'2018) between 29-31 August 2018. This conference is making a mark during the last six years as an Annual event. Every time many eminent speakers from round the world join and share their source of knowledge.

The various sessions which have been planned meticulously will have great positive impact on various cross section of the society. These sessions will prove beneficial to each and every participant and would promote the importance of Quality and Reliability, Information Technology, Mathematical Modelling, Optimization, Networks, Communications and Cyber Security, Safety and Risk Analysis and Humanitarian Technologies.

I extend my heartfelt wishes to all the members who are instrumental in organizing this conference. The outcome of this conference will open up new avenues for collaborative research endeavors in emerging fields of Information Technology.

My best wishes for the success of the "ICRITO'2018".

Dr. W. Selvamurthy

Prof. Sunil Kumar Khatri
Director, Amity Institute of Information Technology
Additional Director, Amity Directorate of Engineering & Technology
Amity University Uttar Pradesh

MESSAGE

I alongwith Organizing Team of 7th International Conference on Reliability, Infocom Technologies and Optimization (ICRITO'2018), welcome all the speakers and delegates to Amity University, a campus with state-of-the-art modern facilities. A milestone in Amity's unceasing endeavor for achieving educational excellence is the establishment of the Amity University Uttar Pradesh as a pace setting University. With the blessings of our beloved Founder President Dr. Ashok K Chauhan and under the vibrant leadership of dynamic Chancellor Dr. Atul Chauhan, University is committed to providing skill-based quality education comparable to the best by international standards and it subscribes to the philosophy of blending modernity with tradition and nurturing talent.

Conference is organized with an aim to explore growing advancements in the fields of Reliability, Infocom Technologies and Optimization. We had got an overwhelming response with speakers and delegates from USA, China, Germany, UK, Australia, Japan, South Africa, UAE, South Korea, Argentina, Malaysia, Oman, Turkey, Jordan, Indonesia, Morocco, Sri Lanka, Slovak Republic, Malta and Bangladesh. Conference will provide a common platform to leading scientists, academicians, researchers, government officials, practicing engineers, industry professionals and students to share their research experiences and views. Besides, it will help in sharing of experience and exchange of ideas, which will foster International/National collaboration.

I quote our Hon'ble Founder President Sir, Dr. Ashok K Chauhan that *At Amity we believe in building long-term sustainable and fruitful relationships*. I welcome again all the delegates and wish for all a comfortable and memorable stay and outcome-based event for all.

Prof. Sunil Kumar Khatri
General Chair, ICRITO'2018

Acknowledgement

We wish to express our appreciation and sincere gratitude to our beloved and visionary Dr. Ashok K Chauhan, Hon'ble Founder President, Ritnand Balved Educational Foundation (RBEF) and dynamic leader Dr. Atul Chauhan, Hon'ble Chancellor, Amity University Uttar Pradesh (AUUP) for their constant encouragement and guidance during the conduct of the ICRITO'2018 Conference from the proceedings of which this book has evolved. Support of Vice-Chancellor, AUUP Prof. (Dr.) Balvinder Shukla was already been there for us whenever needed.

We like to thank Prof. S N Singh, IEEE India Council President-Elect, Prof. Kumar Vaibhav Srivastava, Chairman, IEEE UP Section and Execom members for helping us by IEEE UP Section technically co-sponsoring the conference. We like to acknowledge CSI for their support to organize the conference.

We like to express our thanks to Universidad Nacional de La Pampa (Argentina), St. Petersburg Polytechnic University (Russia), Daffodil International University (Bangladesh), Divsar (Argentina), IETE (India) and SREQOM (India) to be Knowledge Partner for the conference.

We are thankful to ISRO, DRDO, PepsiCo, CoCubes, ATS, Intectools, ON THE BEDS.com, Ceramic Pro, GFD, R.R. Jewellers, Fashioto, TRUTH, BAS PLAST Inc., Shiv Shakti Bedsheets Ashok Nagar Delhi and Vivarte for supporting the Conference.

We are thankful to our eminent speakers for participating in the conference and making it a success. We gratefully acknowledge the contribution from authors of the papers included in the volume. We like to acknowledge the support of session chairs. We like to thank all the technical program committee members who had helped us in the rigorous and timely review process.

We would like to specially mention the help and support given by Prof. Ajay Rana, Director, ATPC towards making this conference successful.

We would like to mention the continuous hard work put by Conference Secretary Ms. Rachna Jain; Conference Technical Co-Chairs Dr. Subhranil Som, Dr. Ajay Vikram Singh and Dr. Mayank Sharma; Sponsorship Team of Dr. Laxmi Ahuja and Ms. Rajbala Simon; Finance Chair Mr. S K Jha, Web Committee Chair Ms. Monika Sharma, all the faculty members and student volunteers of various teams to ensure the success of the conference.

Publication of this book within time would not have been possible without the support of our publishers, Excellent Publishing House, New Delhi.

Raju Kumar, Gurukul Kangri Vishwavidyalaya, India
Rakesh Dhammi, Delhi Institute of Tool Engineering, India
Ramesh C. Poonia, Amity University Jaipur, India
Rana Majumdar, ASET, AUUP, India
Ranjana Ray, JISCE, India
Ranjit Rajak, Sagar University, India
Rashid Mahmood, GCET, India
Ravi Tomar, University of Petroleum & Energy Studies, India
Raza Hasan, Middle East College, Oman
Raziqa Masood, AUUP, India
Renuka Mahajan, Jaipuria Institute of Management, India
Richa Singh, ITS, India
Rinku Supakar, DSCSDEC, India
Ritesh Kumar, Dr. Bhim Rao Ambedkar University, India
Ritu Nidhi, AUUP, India
Ruchika Bathla, AIIT, AUUP, India
Ruchika Malhotra, Delhi Technological University
Runumi Devi, JSS Academy Of Technical Education, India
Rydhm Beri, Lovely Professional University, India
S B Goyal, City University, Malaysia
Sachin Gupta, Dronacharya College of Engineering, India
Sachin Kumar, C-DAC-Pune, India
Sainik Kumar Mahata, Jadavpur University, India

Sandeep Mathur, AIIT, AUUP, India
Sandhya Maitra, IITM, Delhi, India
Sanjay Kumar, Galgotias University, India
Sanjeev Kumar, Amity University Jharkhand, India
Sanjeev Kumar, JNU, Delhi
Sapna Gambhir, Maharisi Dayanand University, India
Sapna Sinha, AIIT, AUUP, India
Sarika Jain, AIIT, AUUP, India
Saru Dhir, AUUP, India
Satish Chander, Waljat College of Applied Sciences, Oman
Seema Sharma, ASET, AUUP, India
Shaik Asif Hussain, AITS, India
Shambhu Kumar Jha, AIIT, AUUP, India
Shamitam Malik, AUUP, India
Shipra Saraswat, AUUP, India
Shobha Tyagi, AIIT, AUUP, India
Shruti Nagpal, Worcester State University, USA
Shubhra Gautam, AIIT, AUUP, India
Shweta Sharma, JK Business School, India
Siddharth Kalra, AUUP, India
Sonia Saini, AIIT, AUUP, India
Soumya Sen, University of Calcutta, India
Sourav Banerjee, Kalyani Government Engineering College, India
Subhash Chandra, University of Delhi, India
Subhrendu Guha Neogi, Sir Padampat Singhanian University, India
Sudarshan Nandy, Budge Budge Institute of Technology, India
Suman Mann, Maharaja Surajmal Institute of Technology, India
Sumanta Bhattacharya, iLEAD, India
Sunil Kumar, Swami Vivekanand Subharti University, India
Sunil Kumar Khatri, AIIT, AUUP, India
Supriya Chakraborty, GKCEM, India
Suraj Saxena, AUUP, India
Suresh Kumar, Manav Rachna International University, India
Swati Narang, AIIT, AUUP, India
Syed Imran Ali Kazmi, Middle East College, Oman
Tauqeer Ahmad Usmani, Salalah College of Technology, Oman

Umang Singh, ITS, India
Upasna Sharma, AIIT, AUUP, India
V A Sankar Ponnappalli, GITAM University, India
Vandana Bhatia, Kurukshetra University, India
Vandana Juyal, BCIIT, Delhi, India
Varsha Deb, Sopra Steria, India
Varun Gupta, ASET, AUUP, India
Vibha Mani, G L Bajaj Institute of Technology and Management, India
Vijay Kumar, Manav Rachna International University, India
Vijaya Padmanabha, Waljat College of Applied Sciences, Oman
Vinnykant Chopra, Anemol Technologies, India
Viral Gupta, Accenture Services India Ltd, India
Vishal Dattana, Middle East College, Oman
Yogita Kansal, Manav Rachna University, India

SPONSORSHIP COMMITTEE

Dr. Laxmi Ahuja, AIIT, AUUP, India, **Chair**
Ms. Rajbala Simon, AIIT, AUUP

FINANCE COMMITTEE

Mr. S K Jha, AIIT, AUUP, India, **Chair**
Ms. Ruchika Bathla, AIIT, AUUP

WEB COMMITTEE

Ms. Monika Sharma, AIIT, AUUP, India, **Chair**
Mr. Abhinav Aggarwal, AIIT, AUUP, India

ORGANIZING COMMITTEE

Sapna Sinha, AIIT, AUUP
Anjani Kumar Bhatnagar, ATPC, AUUP
Ginni Arora, AIIT, AUUP
Amit Pamnani, ATPC, AUUP
Prateek Deka, ATPC, AUUP
Anupam Singh, ATPC, AUUP
Smita Gupta, ATPC, AUUP
Anil Kumar Sharma, ATPC, AUUP
Richa Singh, AIIT, AUUP
Rana Mazumdar, ASET, AUUP
Abhishek Srivastava, ASET, AUUP

EDITORIAL BOARD

EDITORS-IN-CHIEF

Prof. Balvinder Shukla
Vice-Chancellor, AUUP

Prof. Sunil Kumar Khatri
Director, AIIT, AUUP

Prof. Ajay Rana
Director, ATPC, AUUP

Prof. P K Kapur
Director, ACIDR, AUUP

Prof. Yury Klochkov
Peter the Great St. Petersburg Polytechnic University, Russia

EDITORS

Dr. Subhranil Som, AIIT, AUUP

Dr. Ajay Vikram Singh, AIIT, AUUP

Dr. Mayank Sharma, AIIT, AUUP

Ms. Rachna Jain, AIIT, AUUP

ASSISTANT EDITORS

Dr. Laxmi Ahuja, AIIT, AUUP

Ms. Sapna Sinha, AIIT, AUUP

Dr. Sarika Jain, AIIT, AUUP

Dr. Himanshu Gupta, AIIT, AUUP

Dr. Nitin Pandey, AIIT, AUUP

Dr. Neetu Mittal, AIIT, AUUP

Dr. Rana Majumdar, ASET, AUUP

CONTENTS

Founder President's Message	I
Messages	II-V
Keynote Address / Invited Talk Speakers	VI
Acknowledgement	X
ICRITO'2018 Conference Committees	XI

KEYNOTE ADDRESSES

1. Statistical Inference through Machine-Learning and Its Applications in Big Data <i>Hoang Pham, IEEE Fellow</i>	3
2. The Progression of Image Engineering in This Century <i>Yu-Jin ZHANG</i>	4
3. Advances in Research on Recommender Systems <i>YANG Bo</i>	5
4. Fake News Filtering: Semantic Approaches <i>Vitaly Klyuev</i>	6
5. Diagnosing Spine Pathology using Medical Image Analysis <i>Vipin Chaudhary</i>	12
6. Towards Smart World with Ubiquitous Intelligence <i>Jianhua Ma</i>	13
7. Diffusion of Wireless Telecommunication Services: Customer Attrition, Substitution and Optimal Launch of New Generation <i>P.K. Kapur, Saurabh Panwar, Ompal Singh</i>	14
8. Applying the Real-Time Monitoring based on Wireless Sensor Networks: The Bajo Giuliani Project <i>Mario Diván</i>	15
9. Polystore Database Systems for Managing Large Scientific Dataset Archives <i>Manoj Poudel, Shashank Shrestha, Yilang WU, Wanming CHU, Subhash Bhalla</i>	22
10. Creative and Digital Economy: A New Fusion for Innovation <i>Darelle van Greunen</i>	28
11. Using UML-MARTE and TCOZ for AAL System Specifications: A Case Study <i>Mohamed Bettaz, Mourad Maouche</i>	29
12. Effort Analysis of OSS Project Based on Deep Learning Considering UI/UX Design <i>Yoshinobu Tamura, Hironobu Sone, Kodai Sugisaki, Shigeru Yamada</i>	36
13. Marker-less Augmented Reality Techniques for Cultural Heritage <i>Abdenmour El Rhalibi</i>	42
14. Social Web Services: The Way Ahead <i>Zakaria Maamar</i>	43
15. Design and Comparison a High Power Density Magnetically Geared Pm Generator Topology with a Radial Flux Pm Generator <i>H. Bülent Ertan, Reza Zeinali</i>	44
16. Wearable Computing: Prospects and Challenges <i>Syed Akhter Hossain</i>	45
17. Software Implementation of LSFR-Based Stream Ciphers for GSM Cryptosystems <i>Daniel Okunbor</i>	49
18. Testing for Convergence in Microwave Breast Tumour Detection <i>G.G. Senaratne</i>	56

19.	An Overview on Formal Techniques for Understanding Digital Hardware Designs <i>Görschwin Fey</i>	65
20.	Clinical Decision Making through Patient-specific Coronary Blood Flow Modelling <i>Panos Liatsis</i>	70
21.	On Implementation of Energy Aware Cyclic Redundancy Check (CRC) Calculation Unit for Data Integrity Check Applications <i>Afaq Ahmad</i>	71
22.	Investigation of Some Convolutional Neural Network Approaches to Classify Lung Sounds <i>Ugur BAYSAL, Funda Bakca CINYOL</i>	74
23.	Hybridization of Bio-inspired Metaheuristics for Optimization Applications <i>Hanaa HACHIMI</i>	78
24.	Towards Self-explaining Intelligent Environments <i>Serge Autexier, Rolf Drechsler</i>	79
25.	Five Decades of Software Reliability, Past, Present, Future and New Challenges <i>Nestor Ruben Barraza</i>	85
26.	Novel Applications of Computational Intelligence Techniques for Risk Analysis of E-Commerce Customer Satisfaction <i>Masoud Mohammadian</i>	91
27.	A Static-dynamic Approach for UI Model Generation for Mobile Applications <i>Ibrahim Anka Salihu, Rosziati Ibrahim, Asmau Usman</i>	92
28.	Circuit Model for Statistical Method Based Reliability Estimation of MOS Transistors and Analog CMOS Circuits <i>Ayten Kuntman, Hakan Kuntman</i>	97
29.	Signal Processing Challenges in Biohybrid System Design <i>Zdenka Babic</i>	108
30.	On Uncensored Mean First-Passage-Time Performance Experiments with Multi-Walk: A New Stochastic Optimization Algorithm <i>Franc Brglez</i>	113
31.	Adopting High-level Synthesis Approach to Accelerate Power Management Design <i>Katarina Jelemenska, Dominik Macko</i>	119
32.	Enabling Distributed Networks for Connected Vehicles <i>Dhananjay Singh</i>	126
33.	Towards IR 4.0: Internet-of-things and Its Applications <i>Mohd Helmy Abd Wahab</i>	127
34.	Effective Characterization of the Effect of Patient Characteristics and Weather on the Hospital Admission Patterns and Bed Occupancy <i>Lalit Garg</i>	128

RELIABILITY ENGINEERING

1.	High Switching Beam Focusing Electrode Circuit Mosfets Reliabilty Analysis <i>Khilawan Choudhary, Neeraj Kumar, Monisha S.</i>	131
2.	Smart Management Perspective for Sustainable Society/ Business Sustainability, Environmental Sustainability, and Resource Sustainability <i>Anwaar Abdullah Alabri, Jitendra Pandey</i>	135
3.	Proposing a Hybrid Methodology for Game Development <i>Anwaar Abdullah Alabri, Jitendra Pandey</i>	139
4.	Model-Driven Method for Performance Testing <i>Z. Javed, Masoud Mohammadian</i>	143

5.	Accelerated Life Testing and Performance Evaluation of Smart Pressure Transmitters for use in Nuclear Power Plants	151
	<i>Yashasvi Chauhan, N.B. Shrestha, T.V. Santhosh, Vivek Shrivastava, P.K. Ramteke, Gopika Vinod, J. Chattopadhyay</i>	
6.	Prioritizing Types of Vulnerability on the Basis of their Severity in Multi-version Software Systems using DEMATEL Technique	157
	<i>Swati Narang, P.K. Kapur, D. Damodaran, R. Majumdar</i>	
7.	Influence of Junction Temperature on Reliability of an Insulated Gate Bipolar Transistor	163
	<i>Sai Sarath Kruthiventi, Meghana Chowdary Rayedi, Sivateja Nallamothu</i>	

QUALITY & RISK ANALYSIS

1.	On the Application of Cross-Project Validation for Predicting Maintainability of Open Source Software using Machine Learning Techniques	171
	<i>Ruchika Malhotra, Kusum Lata</i>	
2.	Verification of On-board Software of ISRO Launch Vehicles Using Polyspace - A Case Study	178
	<i>Sherine K., Prashant Ranjan, Jayalal N., Gopalakrishnan T., Valsa B.</i>	
3.	Energy Audit-A Clean, Alternative and Cost-Effective Way to Replace Conventional Energy	184
	<i>Sujit Dhar, Debabrata Roy, Biswajit Dutta, Ankur Ganguly, Pradip Kumar Sadhu, Diganta Sengupta</i>	
4.	A Radiation-Hardened 12-bit SAR ADC Design	194
	<i>Honghui Tang, Haibin Wang, Zhijian Hui, Tao Qin, Xinyi Hu, Younis Ibrahim, Xixi Dai, Yangsheng Wang, Li Cai, Gang Guo, Zicai Shen</i>	
5.	Laboratory Health and Safety Infrastructure in University - A Benchmarking in UAE	199
	<i>Hardeep Kumar, Ved P. Mishra</i>	
6.	Study of Security Features of Bank Cheques and Credit Cards and Decipherment	203
	<i>Anju Annie Thomas, Emna Jeridi, Bhoopesh Kumar Sharma, Ved P. Mishra, Mohamamad Al Shamsi, Mohammad Al Khalloufi</i>	

DATA ANALYTICS, DATA MINING AND DATA WAREHOUSING

1.	Understanding Relation between Public Sentiments and Government Policy Reforms	211
	<i>Mansi Srivastava, Sunil Kumar Khatri, Sapna Sinha, Prashant Johri</i>	
2.	Get-a-Doc: A Doctor Recommender System	217
	<i>Abhinav Singh, Isha Goyal Parmeet Kaur, Chetna Dabas</i>	
3.	Clustering Techniques for Traffic Classification: A Comprehensive Review	221
	<i>Kate Takyi, Amandeep Bagga, Pooja Goopta</i>	
4.	Fostering the Interoperability of the Measurement and Evaluation Project Definitions in PAbMM	228
	<i>Mario Diván, María Laura Sánchez Reynoso</i>	
5.	Improving Classification Accuracy of Automated Text Classifiers	235
	<i>Shivam Rastogi</i>	
6.	Design Pattern Detection using Machine Learning Techniques	242
	<i>Shivam Chaturvedi, Amrita Chaturvedi, Anurag Tiwari, Shalini Agarwal</i>	
7.	Analogizing of Evolutionary and Machine Learning Algorithms for Prognosis of Breast Cancer	248
	<i>Anubha Sethi</i>	
8.	The Role of Big Data Mining in Healthcare Applications	252
	<i>Laura Elezabeth, Ved P. Mishra, Joanita Dsouza</i>	
9.	Analysis of Audio Features for Music Representation	257
	<i>Rhythm Bhatia, Saumya Srivastava, Vandan Bhatia, Manpreet Singh</i>	

10. Information Retrieval on Tweets collected during Disaster Situations	262
<i>Saumya Srivastava, Manpreet Singh, Kripabandhu Ghosh</i>	
11. Dynamic Clustering of n-Dimensional Data on Tangential Space	267
<i>Mayank Sharma, Amit Srivastava, Sudhanshu Shankar, Sunil Kumar Khatri</i>	
12. Graph Database for Recipe Recommendations	271
<i>Vasvi Bajaj, Rajat Bhusan Panda, Chetna Dabas, Parmeet Kaur</i>	
13. Analysing the 1997 Chandmari Landslide	277
<i>Kaushik Ramanathan, Nirmala Vasudevan, Drisya R.</i>	
14. Business Intelligence Development by Analysing Customer Sentiment	282
<i>Partha Ghosh, Subhranil Som, Soumya Sen</i>	

MOBILE COMPUTING AND WIRELESS NETWORKING

1. Implementation of Energy Constraints of S-MAC Protocol	289
<i>Meena Malik, Mukesh Sharma</i>	
2. Analyzing the Internal Parameters of Free Space Optical Communication	295
<i>Manpreet Kaur, Anuranjana, Sanmukh Kaur, Aditya Kesarwani, Pawan Singh Vohra</i>	
3. Traffic Prediction in Telecom Systems Using Deep Learning	299
<i>Prashant Kaushik, Sajal Singh, Pankaj Yadav</i>	
4. Cross Layer Optimization for Wireless Video Transmission Using Machine Learning	304
<i>Madhushree Basavarajaiah, Priyanka Sharma</i>	
5. Lifetime Enhancement of Wireless Sensor Networks by using Sine Cosine Optimization Algorithm	309
<i>Ashish Pandey, Abhishek Rajan, Arnab Nandi</i>	
6. Avoidance of Energy Holes in Wireless Sensor Networks: A Review	315
<i>Ranjita Joon, Parul Tomar</i>	
7. Reliable Lifetime Assessment for Routing in Heterogeneous Wireless Sensor Network with Energy Harvesting Nodes Placement	322
<i>Priyanka, Deepak Sharma, Amarendra Goap*, A K Shukla, Amol P. Bhonekar</i>	
8. Artificial Intelligence Based Energy Efficient Grid PEGASIS Routing Protocol in WSN	330
<i>Shokat Ali, Rakesh Kumar</i>	
9. Smart Vehicle System for Road Safety During Foggy Weather	337
<i>Ravinder Kaur, Rydhm Beri, Mithilesh Kr. Dubey</i>	
10. Estimation of Outage Duration for a Mobile Sensor Node	341
<i>Ritwik Haldar, Kirtan Gopal Panda, Ashraf Hossain</i>	
11. Remote Node Battery Monitoring and Diagnostic System for Wireless Sensor Networks using Xbee and Java	345
<i>R.K. Dhammi, K.M. Soni, S. Selvam, Prabhdoyal Singh</i>	
12. Optimization of Cluster Head Selection in Hierarchical Clustered Sensor Networks	351
<i>Japman Kaur Dhaliwal, Sharad Saxena</i>	

CLOUD COMPUTING

1. A Survey on QOS and Fault Tolerance based Service Scheduling Techniques in Fog Computing Environment	361
<i>M. Sri Raghavendra, Priyanka Chawla</i>	
2. A Novel Approach for Water Leakage Detection and Localization	368
<i>Anuj Purwar, Mohit Patel, Mohit Garg, Karan Ahuja</i>	
3. A Review on Container-Based Lightweight Virtualization for Fog Computing	373
<i>M. Sri Raghavendra, Priyanka Chawla</i>	

4.	Comparative Analysis of Security Threats in Mobile Cloud Computing Environment <i>Vishal, Bikrampal Kaur, Surender Jangra</i>	380
5.	Leveraging the Power of Cloud Computing for Technology Enhanced Learning (TEL) <i>Deepshikha Aggarwal</i>	385
6.	Comparative Study of Task Scheduling Algorithms through Cloudsim <i>Ram Pratap, Taskeen Zaidi</i>	390
7.	Remote Online Voting System using Aneka Platform <i>Karishma Varshney, Rahul Johari, R. L. Ujjwal</i>	394
8.	Truncated Wallace Based Single Precision Floating Point Multiplier <i>Abhay Sharma, Tarun Kumar Rawat</i>	399

IMAGE PROCESSING TECHNIQUES

1.	A Comparative Approach of Segmentation Methods Using Thermal Images of Apple <i>Yogesh, Ashwani Kumar Dubey, Rajeev Ratan Arora</i>	407
2.	Edge Detection in Dermoscopic Images by Linear Structuring Element <i>Sudhriti Sengupta, Neetu Mittal, Megha Modi</i>	413
3.	A Two-Way Image Quality Enhancement for Iris Recognition System Using Modified Enhanced Histogram Equalization for Normalization <i>Samuel Enseriban Belanda, Abdulrahman Aminu Ghali, Sapiee Jamel, Mustafa Mat Deris</i>	419
4.	Detecting Future Terrorism Trend in India Using Clustering Analysis <i>Shivali Baghel, Yogesh</i>	424
5.	Non-Destructive Analysis of Defected Portions of Fruits Using Integrated Segmentation Process <i>Yogesh, Ashad Ahmed, Iman Ali</i>	431
6.	Segmentation of Different Fruits Using Image Processing Based on Fuzzy C-means Method <i>Yogesh, Iman Ali, Ashad Ahmed</i>	438
7.	UMLBP - A Novel Approach for Face Recognition System using OPENCV <i>Manish Kumar, Rahul Gupta, Dinesh Kumar, Kota Solomon Raju</i>	445

ADVANCES ON COMPUTING MECHANISMS

1.	A Hybrid Nonlinear Manifold Detection Approach for Software Defect Prediction <i>Soumi Ghosh, Ajay Rana, Vineet Kansal</i>	453
2.	Modelling and Forecasting Bus Passenger Demand using Time Series Method <i>Anila Cyril, Raviraj H. Mulangi, Varghese George</i>	460
3.	Development of Web Based Light Intensity Control of LED Using LabVIEW <i>Neeraj Khera, Prateekshya Biswal, Chintalapudi Likhith</i>	466
4.	Response Time Based Balancing of Load in Web Server Clusters <i>Deepti Sharma</i>	470
5.	Predicting Fluctuations in Cryptocurrencies' Price using users' Comments and Real-time Prices <i>Pavitra Mohanty, Darshan Patel, Parth Patel, Sudipta Roy</i>	475
6.	A Comparative Study of Machine Learning and Deep Learning Techniques for Sentiment Analysis <i>Krutika Jain, Shivani Kaushal</i>	480
7.	Quantitative Ultrasound for Investigation of Cancellous Bone Properties in Osteoporosis Management <i>Kiran Kale, Apurva Naik</i>	485

ARTIFICIAL INTELLIGENCE AND EXPERTS SYSTEMS

1.	Modelling and Adaptive Systems for Smart Cities <i>Masoud Mohammadian</i>	493
2.	Epileptic Data Classification Using Frequency Power Estimation of Channel (FP1-F7) in Children <i>Alpika Tripathi, Geetika Srivastava, P.K. Maurya</i>	498
3.	Intrusion Detection System Providing Security with Machine Learning Technique <i>Vaibhav, Sunil Kumar Khatri, Subhranil Som</i>	502
4.	Redaction of Protected Health Information in EHRs using CRFs and Bi-directional LSTMs <i>Apar Madan, Ann Mary George, Apurva Singh, M.P.S. Bhatia</i>	508
5.	Advanced Plant Leaf Classification Through Image Enhancement and Canny Edge Detection <i>Jibi G. Thanikkal, Ashwani Kumar Dubey, Thomas M.T.</i>	513
6.	Gene Ranking: A Novel Approach Using Multi-Objective Genetic Algorithm <i>Priyotit Das, Sujay Saha, Anupam Ghosh, Kashi Nath Dey</i>	518
7.	Enhancing the Ability to Communicate by Synthesizing American Sign Language using Image Recognition in A Chatbot for Differently Abled <i>Arjun Pardasani, Ajay Kumar Sharma, Sashwata Banerjee, Vaibhav Garg, Debdutta Singha Roy</i>	524
8.	Forecasting Direction of Stock Index Using Two Stage Hybridization of Machine Learning Models <i>Puneet Misra, Siddharth Chaurasia</i>	528
9.	Feature Selection using Mutual Information and Adaptive Particle Swarm Optimization for Image Steganalysis <i>Jasmanpreet Kaur, Singara Singh</i>	533
10.	Low Cost Herbal Mosquito Repellent Using Arm Based Device <i>Prabhjyot Singh Sodhi, Neelam Rawat, Utkarsh Saxena</i>	539
11.	An Integrated Automatic Number Plate Recognition for Recognizing Multi Language Fonts <i>Arun Vaishnav, Manju Mandot</i>	545
12.	An Intelligent Bin Management System Design for Smart City using GSM Technology <i>Bandana Prasad, Sidhant Dalmia, Sindhu Dasari, Namita Arya</i>	551
13.	Analysis of Process Scheduling Algorithm for Multiprocessor System <i>Chandresh Suman, Gaurav Kumar</i>	557

NETWORKS, COMMUNICATIONS AND CYBER SECURITY

1.	Digital Image Security Using Hybrid Visual Cryptography <i>Shradha Bhatia, Sunil Kumar Khatri, Ajay Vikram Singh</i>	565
2.	A Novel Approach to Hide Text Data in Colour Image <i>Suraj Kumar, Santosh Kumar, Neeraj Kumar Singh, Anandapрова Majumder, Suvamoy Changder</i>	572
3.	Dynamic Channel Allocation in Small Cells <i>Gadiraju Divija Swetha, Jitender Grover, Garimella Rama Murthy</i>	577
4.	Circularly Polarized Stub Integrated Rectangular Slotted Patch Antenna for WLAN Application <i>Tejpal Jhajharia, Vivekanand Tiwari, Deepak Bhatnagar</i>	584
5.	Performance Evaluation of Content Addressable Memories <i>Venkata Ramana Datti, P.V. Sridevi</i>	591
6.	A Generalized Model of Text Steganography by Summary Generation using Frequency Analysis <i>Anandapрова Majumder, Suvamoy Changder</i>	594
7.	A Hybrid Approach for Energy Efficient Network Design <i>Varsha Singh, Abhishek Srivastava, Rana Majumdar, Sunil Kumar Chowdhary</i>	600

8.	Analysis and Comparison of Process Mining Algorithms with Application of Process Mining in Intrusion Detection System	606
	<i>Ved Prakash Mishra, Joanita Dsouza, Laura Elizabeth</i>	
9.	4QAM OFDM Visible Light Communication using Laser	611
	<i>Chetna Verma, Chetan Selwal</i>	
10.	A Single Segment Generation Technique for the Design of DCSK System (Differential Chaos Shift Keying System)	616
	<i>Khamis Salim Said Al Nayari, Nizar Al Bassam, Shaik Mazhar Hussain, Kamaluddin Mohamed Yosof, Sumesh Eratt Parameswaran, Shaik Ashfaq Hussain</i>	
11.	The Optimal Design of Wideband Second-order Microwave Differentiator	625
	<i>Usha Gautam, Tarun K. Rawat, D. K. Upadhyay</i>	
12.	Evaluation of Different Selfish Node Detection Techniques in DTN	629
	<i>Atul Sharma, Lakshay</i>	

INTERNET-OF-THINGS

1.	Security Issues and Challenges in Perception Layer of Smart Healthcare	635
	<i>Anjali Mahanty, Subhranil Som, Sunil Kumar Khatri</i>	
2.	Accurate Real-Time Location Map Matching Algorithm for Large Scale Trajectory Data	641
	<i>Kanta Prasad Sharma, Ramesh C. Poonia, Surendra Sunda</i>	
3.	IoT based Health Monitoring System for Critical Patients and Communication through Think Speak Cloud Platform	647
	<i>Zahir bin Sulaiman Al Brashdi, Shaik Mazhar Hussain, Kamaluddin Mohammad Yosof, Shaik Ashfaq Hussain, Ajay Vikram Singh</i>	
4.	Smart Security Surveillance using IoT	653
	<i>Sharmin Akter, Rehana Afroz Sima, Md. Sohid Ullah, Syed Akhter Hossain</i>	
5.	Threats Paradigm in IoT Ecosystem	658
	<i>Anshul Jain, Tanya Singh, Satyendra K. Sharma</i>	
6.	IoT based Street Light Visibility and Water Logging Monitoring for Development of a Smart City	665
	<i>Suman Kumar Laha, Ankur Ganguly, Rishav Bhattacharya, Pradip Kumar Sadhu, Ashok Kumar Naskar</i>	
7.	Prototype Proposal for IoT based Two-Wheeler Ignition and Security Enhancements	671
	<i>Sanjoy Banerjee, Abhijit Kumar Pal, Diganta Sengupta</i>	
8.	Power-aware Aggregated SEARCH: Enhancing Spectrum and Energy Efficiency of Sensor Networks	675
	<i>Neeti Gupta, Vidushi Sharma</i>	
9.	Security Implications in IoT using Authentication and Access Control	682
	<i>Danish Showkat, Shubranil Som, Sunil Kumar Khatri</i>	
10.	Barricades in Network Transformation from 4G to 5G in India	688
	<i>Sorabh Puri, R.S. Rai, Karunesh Saxena</i>	
11.	Development of an App Enabled Smart Helmet for Real Time Detection and Reporting of Accidents	696
	<i>Joyendra Roy Biswas, Shubham Kachroo, Parth Chopra, Shubham Sharma</i>	
12.	Proposing an Encryption/ Decryption Scheme for IoT Communications using Binary-bit Sequence and Multistage Encryption	702
	<i>Iqra Hussain, Mukesh Chandra Negi, Nitin Pandey</i>	
13.	IOT Based Fire Fighting Robot	706
	<i>Megha Kanwar, Agilandeewari L.</i>	
14.	Smart Traffic Management System using IoT in India	712
	<i>Aditya Singh, Ajay Vikram Singh, Sunil Kumar Khatri</i>	

15. IoT Based Smart Network for Blood Bank	719
<i>Ahmed AL-Kalbani, Syed Imran Ali Kazmi, Jitendra Pandey</i>	
16. Accidents Detection and Prevention System to reduce Traffic Hazards using IR Sensors	724
<i>Naji Taaib Said Al Wadhahi, Shaik Mazhar Hussain, Kamaluddin Mohammad Yosof; Shaik Ashfaq Hussain, Ajay Vikram Singh</i>	
17. An Encryption-based Secure Framework for Data Transmission in IoT	729
<i>Shikha Chaudhry</i>	

NATURAL LANGUAGE PROCESSING

1. Cyberbullying Detection using Recursive Neural Network through Offline Repository	737
<i>Nidhi Chandra, Sunil Kumar Khatri, Subhranil Som</i>	
2. An Event-local View: Emotion Interplay in the Underlying Social Graph of a Literary Text	743
<i>Ramadas S. Mahale, Sunil Pai G., Sai Tejaswini M.V., Bhaskarjyoti Das</i>	
3. Word Sense Disambiguation: Supervised Program Interpretation Methodology for Punjabi Language	749
<i>Himdweep Walia, Ajay Rana, Vineet Kansal</i>	
4. An Ensemble-Classifier Based Approach for Multi-class Emotion Classification of Short Text	755
<i>Shivangi Chawla, Monica Mehrotra</i>	
5. English-Maithili Machine Translation and Divergence	762
<i>Ritu Nidhi, Tanya Singh</i>	
6. The Speech Synthesis System Review for the IsiXhosa Language	766
<i>Siphe Mhlana, Phillip Choshi</i>	

SOFTWARE ENGINEERING

1. Effort Estimation of Agile Development using Fuzzy Logic	773
<i>Abhishek Saini, Laxmi Ahuja, Sunil Kumar Khatri</i>	
2. Saving and Loan Information System of Cempaka Cooperative Web Based	778
<i>Elena Caroline, Mira Ziveria</i>	
3. UX Engagement and Interaction	785
<i>Yemisi Oyedele, Darelle van Greunen, Alida Veldsman</i>	
4. 800 kWh Waste to Energy Power System using Fruit, Vegetable and Cooked Waste Fraction of Municipal Solid Waste	792
<i>Neena Ahuja, Dipali Bansal, Khwaja M. Rafi</i>	
5. Design and Development of a Tool for Analyzing the Effect of Refactoring on Maintainability	800
<i>Ruchika Malhotra, Shweta Meena</i>	
6. The Impact of Agile Software Development Process on the Quality of Software Product	805
<i>Parita Jain, Arun Sharma, Laxmi Ahuja</i>	
7. Importance of RTM for Testing a Web-based Project	809
<i>Mamta Madan, Meenu Dave, Anisha Tandon</i>	
8. Effect of Run-Time Triggered Multinet Trojan on Max-log-MAP Decoder	812
<i>Aiswarya M.S., B. Yamuna, Karthi Balasubramanian</i>	
9. Effect of Hardware Trojans on a Low Power and Area Efficient Max-log-MAP Decoder	817
<i>Arul Jothi V., Karthi Balasubramanian, B. Yamuna</i>	
10. Incorporating Autonomic Capability as Quality Attribute for a Software System	822
<i>Puneet Kumar Aggarwal, P.S. Grover, Laxmi Ahuja</i>	
11. Smart LED with Power Allocation Algorithm for Indoor Visible Light Communication System	827
<i>Shashikant, Parul Garg</i>	

12. **Design and Development of Graphical User Interface (GUI) with MATLAB for Early Detection of Diabetic Foot Ulcers using Infrared Imaging** 833
Nasira Said Juma Mahil Al Qalhati, Shaik Asif Hussain, Ajay Vikram Singh
13. **ERP Implementation in the Oil and Gas Sector: A Case Study in Sultanate of Oman** 840
Ashraf AL Jafari, Smitha Sunil Kumaran Nair

MATHEMATICAL MODELLING & OPTIMIZATION

1. **Return-Maximizing in Fuzzy Portfolio Processes under Average Value-at-Risk Constraints** 849
Yuji Yoshida
2. **Modelling and Development of Compressed Air Powered Human Exoskeleton Suit Human Exoskeleton** 855
Manthan V. Pawar, S.S. Ohol, Ashutosh Patil
3. **Identification of Optimum Locations for Charging of Electric Vehicles** 860
Siddharth Gupta, Gunjar Ahuja, Girish Kumar
4. **Simultaneous Image Segmentation and Object Recognition** 866
Gaurav Bansal
5. **Model-Order Reduction Usage of Stability Equation Method Designed for Discrete-Time Systems** 870
D. K. Sambariya, Trishla Sharma
6. **An Effective Approach for Reduction of Discrete Time System using Modified Cauer Form** 876
D. K. Sambariya, Trishla Sharma
7. **Effect of Sensing Duration Optimization in Cooperative Spectrum Sensing Game** 882

Abstract: Cempaka Cooperative is a type of savings and loan cooperative that perform members data management and their conventional transaction, so it has the risk of data inaccuracies and the length of time required for data management. This study aims to build a savings and loan information system on Cempaka Cooperative in web based using prototype system development method which includes system analysis that use flowchart, system design that use Unified Modeling Language (UML) modeling, encoding that use Hypertext Preprocessor (PHP) programming language, data storage using MySQL, and system testing that use black box testing. The results of this study is a system that can be used to manage data member, savings transactions, loan transactions, cash withdrawal transactions, and loan installment transactions.

Keywords: Saving and loan, prototype, UML, PHP, MySQL

I. INTRODUCTION

Cooperative is a business entity consisting of persons or legal entity cooperative with the base of its activities based on the principle of cooperatives as well as a people's economic movement based on the principle of kinship and can be an alternative financing to increase working capital and investment for small and medium entrepreneurs. Savings and Loans cooperatives are cooperatives with savings and loan services business for their members. Savings and loan cooperatives carrying out their activities based on the principle of kinship are useful to educate members to actively save regularly and can form their own capital from the savings and can also lend funds to cooperatives for venture capital [1].

The Cempaka Cooperative was founded by the unifying ties of regional and environmental people at St. Paskalis Church on July 22, 2001 and located at St. Paskalis Church, Jakarta, Indonesia. The initial capital amount is Rp 430, 000 and the member's deposit until December 2016 is Rp 339, 343, 650. The management of Cempaka Cooperative is currently led by Mr. Tjhin Wie Nen. The number of officers in charge of running cooperative activities each week amounted to 3 people, namely Mrs. Margaret Christine, Mrs. Mary Magdalena Juniati, and Mrs. Tan Giok Kiaw. Members of the Cempaka Cooperative are the people whose residence is under the aegis of the Parish of Cempaka Putih, the Church of St. Paskalis which is divided into 10 regions and each region is divided into 5 to 7 neighborhoods. Area coverage starts from Sumur Batu, Kemayoran, Serdang, Cempaka Baru, Harapan

Mulia, Rawa Selatan, Galur, Tanah Tinggi, Rawa Sari, Mardani, Kali Baru, and Cempaka Putih (Cempaka Putih Barat, Cempaka Putih Tengah, Cempaka Putih Utara, Cempaka Putih Timur). In Desember 2016, total members are 186.

The main activity of Cempaka Cooperative is to provide saving and lending services for its members. Cempaka Cooperative has several facilities to serve the member's savings and loan transactions such as member book, credit slip and debit slip. The cooperative officers also have a data card as their data storage container for recording each of member's savings and loan transaction data. Any savings and loan transaction data recorded in the member book, it will be recorded also on the data card. Currently the system that runs in Cempaka Cooperative is still run conventionally such as recording data of the members, saving transaction data, loan transaction data, payment transaction data of loan installment and cash withdrawal transaction data.

From all analyzes of the current process of savings and borrowing activities, researchers get summarized some obstacles experienced by officers so far i.e (1) Search saving and loan data members will require a longer time, especially when members do not remember the number of member book (*Buku Anggota* or BA) because officers will search the member data one by one based on member's name; (2) Assignment of BA number to new member still by manual means officer must check the last BA number so it also takes a longer time; (3) In the registration of new members, to ensure that the prospective member has not been registered in the membership of the cooperative, the officer shall first check the data of the registered member. After member data is checked, the new officer can process the registration of candidate member data. Although there has never been a double member data error on Cempaka Cooperative, the process still takes a little longer; (4) Officers must perform repetition in recording data saving and loan that is in member book, data card, credit slip and debit slip. The officer also repeats the recording again on the final recap of the day, transferring the data from the credit slip (*Slip Uang Masuk* or SUM) to the summary of SUM and data from the debit slip (*Slip Uang Keluar* or SUK) to the summary of SUK. Recording of data repeatedly will take longer and may result in inaccurate data; (5) In making a data report member, officers must enter or update member data from a member book or data card into Microsoft Excel. In

making savings and loan reports, officers should also include or update the savings and loan data of each member from SUM summaries and summary of SUK or from member books and data cards. Report generation activities on the current system also take longer.

Based on the above problems, the formulation of the problem in this research is how to build web-based savings and loan information system on Cempaka Cooperative that can help the cooperative officers in performing data processing members, savings transactions, loan transactions, cash withdrawal transactions and loan installments quickly and accurate.

II. LITERATURE REVIEW

In this section the researchers cite references related to the research theme from various sources such as journals and books such as about saving and loan cooperatives, related previous research, information system, prototype system development method, database, MySQL software, system flowchart, Unified Modeling Language, web and black box testing.

A. Information System

Information Systems is a system within the organization that brings daily transaction management needs, supports operations, managerially, and strategic activities of an organization and provides certain outside parties with the required reports [2].

B. Method of Prototype Development System

Prototype method is a system development method that presents a complete picture of the system and the user can see the modeling of the system from the display side and procedural techniques to be built. Stages of prototype method that is identification and analysis of system requirements, system design, software coding, testing and system implementation [3].

C. Database

The database is a related set of data that connect each other logically and an explanation of the data, designed to find the data needed by an organization. Database design is divided into 3 phases: conceptual, logical, and physical database design. Entity Relationship Model is used as a tools of communication between database designers and users of the system during the analysis or design phase of the database development process in the framework of the development of information systems as a whole. Entity Relationship Diagram is a diagram to illustrate the conceptual design of the conceptual model of a relational database [4]. MySQL is a relational database software that is Relational Database Management System (RDBMS) that uses database language Structure Query Language (SQL) [5].

D. System Flowchart

System flowcharts are used to simplify a set of processes or procedures to facilitate user understanding of the information.

The design of a flowchart should be concise, clear, and logical. System flowchart symbols can be categorized into 4 parts namely input and process, output, storage, and others [6].

E. Unified Modelling Language (UML)

UML is the standard specification language used for documenting, specifying and building software. UML is a methodology in developing object-oriented systems and is also a tool to support system development. Tools used in object-oriented design based on UML include Use Case Diagrams, Activity Diagrams, and Class Diagrams [7].

F. Web

The Web is a collection of pages displaying text data, motionless or motion picture data, animation data, sound, video and or all of them, both static and dynamic, forming a series of interconnected buildings in which each is linked to a hyperlink [8].

G. Black Box Testing

Black box testing is software testing for functional requirements. This test aims to check whether the application is running as expected [9]. There are two ways of testing with black box testing that is (1) alpha test is to test the system directly by way of trial data, that is by entering the appropriate data or correct and also with the wrong data; and (2) beta test method is system testing done objectively that is direct to general user by using questionnaire to know opinion of respondent to built system. The results of the test will be written on the given questionnaire [10].

H. Previous Research

There is a relevant previous research that is the research that produces information systems that can help improve the efficiency of work in Cooperative Mitra Mandiri which facilitate treasurer in recording transactions of cooperative members using Waterfall system development method [11].

III. RESEARCH METODOLOGY

This section will describe the research materials, system development methods, and testing methods.

A. Research Materials

During this research, researchers conducted interviews with the heads of cooperatives and cooperative officers to find out every process of recording and processing of savings and loan data that run in Cempaka Cooperative until current date, the obstacles often faced by the heads of cooperatives and the officers with a system that runs in the current, and the expected needs of the new system development. Researchers also make direct observations for 2 months in the Cempaka Cooperative to see the practice and flow of processes undertaken by cooperative officers in serving the needs of member transactions.

B. System Development Methods

Researchers undertake the development of a new system in the flow of savings and loan activities process in Cempaka

Cooperative by using the method of prototype system development. The steps taken are analysis, design, encoding, testing, and system implementation.

C. Testing Methods

Test method used is black box testing, where the user considers the software is a black box that sees software from the front end side only without knowing what the contents or codes in the black box. Testing to know that the software performs the function as expected. Testing is documented in written form and aims to check whether the application is running as expected. Functional testing involves how well the system performs its functions including user commands, data manipulation, search and business processes, screen users, and integration. The framework of Cempaka Cooperative development is illustrated in Figure 1.

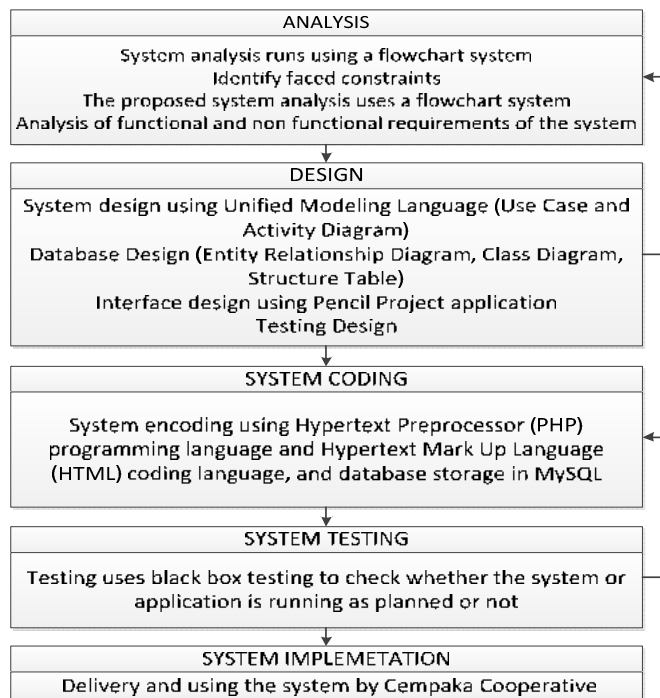

Fig. 1. Framework of Developing Cempaka Cooperative System

IV. DISCUSSION

In this section will be explained about the system analysis, system design, system coding results and test results that have been conducted.

A. System Analyses

In performing analysis on the system that is currently running conventionally used flowchart to be able to describe the work flow process and data performed. There are several flowcharts generated from the analysis of the current system i.e member registration process, savings process, loan process, loan installment payment process, cash withdrawal process, end of day recap process, member data reporting process, and process of making savings and loan report. The saving process flowchart on the old system can be seen in Figure 2.

B. Proposed System Analysis

In the proposed system, the main recording and processing of data and transactions conducted on the system so as to facilitate officers and heads of cooperatives in doing savings and loan activities as well as in making a summary of money coming in and money out and preparing reports. However, in this proposed system, the member book will still be used because the member book is still a formal requirement of the Cempaka Cooperative organization as well as a proof of membership for Cempaka Cooperative members. Every time the transaction, after the officer to input data into the system, the officer only copy the data once in the book members. On the right-hand side of each row of data in the member book there is a paraf column. During the conventional system that has been running, the column is only filled by the officers. However, in the system that the researcher proposes, officers and members will equally give paraf to the column. The ink color of the pen used by officers and members to give the initials can be differentiated. Initial is a proof of receipt that the transaction has been completed.

In performing analysis on the proposed system saving used flowchart to be able to describe the flow of work processes and data performed on the proposed system. There are several flowcharts generated from the proposed system analysis namely member registration process, savings process, loan process, loan installment payment process, cash withdrawal process, end-of-day recap process, member data reporting process, and savings and loan reporting process. The saving process flowchart on the proposed system can be seen in Figure 3.

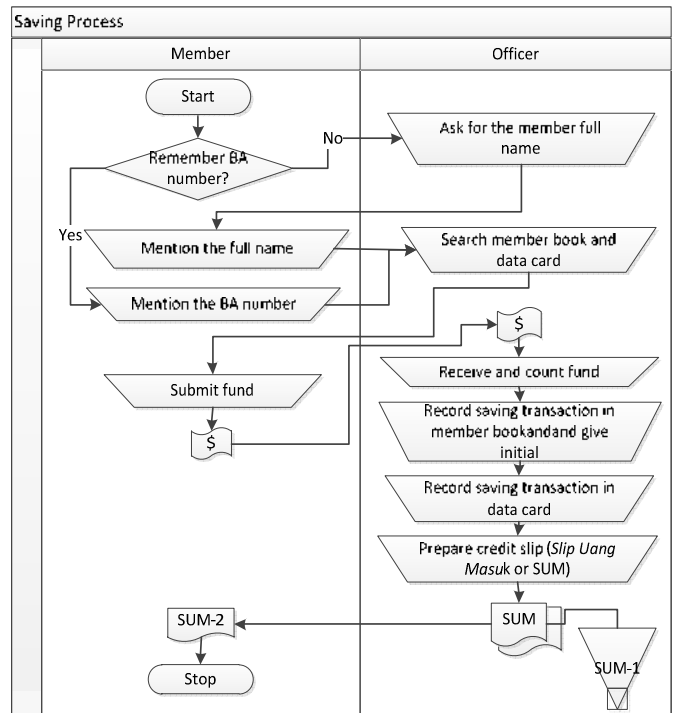

Fig. 2. Flowchart of Saving Process on Old System

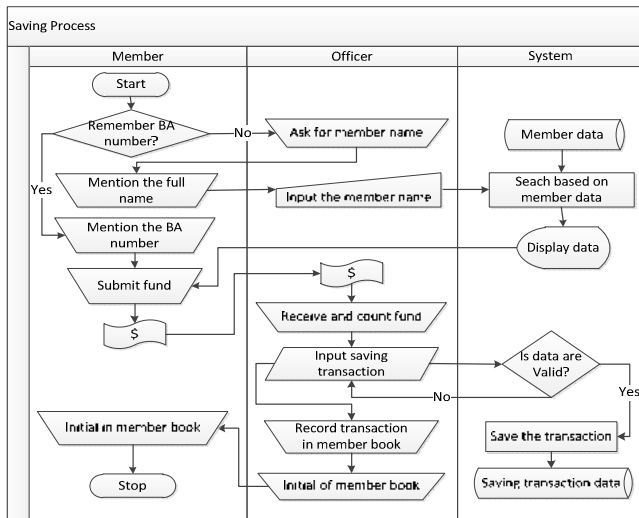

Fig. 3. Flowchart of Saving Process on Proposed System

C. Requirements Analysis

TABLE I: FUNCTIONAL REQUIREMENTS

OFFICER AND HEAD OF COOPERATIVE	
Function	Description
Login	To enter the system
Member data processing	Input, edit, and delete member data. Search member data based on BA number or member’s name. Display the detail of member private date in PDF form. Display member’s saving transaction data in PDF form. Display member’s loan transaction data in PDF form.
Saving transaction processing.	Input saving transaction. Delete or cancel saving transaction. Search saving transaction based on BA number.
Loan transaction processing.	Input loan transaction. Delete or cancel loan transaction. Change the status of loan transaction to paid-off loan. Search loan transaction based on BA number or loan number.
Loan installment transaction processing	Input loan installment transaction. Delete or cancel loan installment transaction. Search loan installment transaction based on BA number or loan number.
Cash withdrawal transaction processing	Input cash withdrawal transaction. Delete or cancel cash withdrawal transaction. Search cash withdrawal transaction based on BA number.
HEAD OF COOPERATIVE	
Function	Description
Admin data processing	Input, edit, and delete admin data. Search admin data based on username or admin name.

Functional requirements are necessities that contain functions that the system can perform. In the system to be proposed there are 2 users of officers and heads of cooperative. There are several functions for each user that will be displayed in the menus of the designed application along with the features in each function. Functional requirements for officers and heads of cooperatives are described in Table I.

From data processing and conducted transactions, the system will produce output that can accessed by officers and head of cooperatives as follows: (1) Summary of entry money and cash outflow. Search and display data of all transactions daily based on selected date in PDF form; (2) Member data reports. Search and display member data from start of cooperative establishment to selected date in PDF form; (3) Savings and Loans Report. Finding and displaying total deposits (principal savings, mandatory savings, voluntary savings) and remaining loan of all members from start of cooperative establishment to date selected in the form of PDF and Microsoft Excel.

Non functional requirements is a requirement that refers to the tools used in running a system, can be seen in Table II.

TABLE II : NON FUNCTIONAL REQUIREMENTS

Tools	Non Functional Requirements
Hardware	<ul style="list-style-type: none"> 1 unit of HP Pavilion 14-AC186TU Core i3-5005U, RAM 4GB notebook 1 unit of Mouse
Software	<ul style="list-style-type: none"> Windows 7 or Windows 10 Operating System Mozilla Firefox Browser. XAMPP V.3.2.1 (phpmyadmin, apache, MYSQL). Adobe Reader PDF and Microsoft Excel. Notepad++
Security	<ul style="list-style-type: none"> The application system with <i>password</i>. The pages on the application system can not be directly opened without login.
Notification	<ul style="list-style-type: none"> Used to display notification of success or failure of functions that run on the system. Used to display information in filling in the columns when sending data are not filled. Used to display information to confirm changes and deletion of data.

D. System Functional Design

In performing system functional design, UML is used use case diagram and activity diagram. Use cases diagram describe simply the main functions of the system and the various users that can interact with the system [12]. From the discussion conducted with the user, obtained the necessary needs on

information systems to be used such as the functions contained in the system, the purpose of the functions provided, the actors or users who can use these functions, as well as interaction between actor with the function. There are two actors who can interact with the system and perform the existing functions of the head of the cooperative and the officer as described in Figure 4.

Head of the cooperative has a special function that can register officers to admin applications and perform other data processing such as edit, delete, and search data. All other functions can be done by the head of the cooperative and officers. In the main functions there are also features of data processing and transaction processing such as edit, delete, and search data. In view report function, the head of cooperative and officer can search member data report and savings and loan report based on selected date, then report will be displayed in PDF form with period of time from start of cooperative stand up to date selected. To view the sums of money coming in and out, users can search for a summary of the money based on the date selected, the incoming and outgoing summarized sum will be displayed in PDF format and contains information about all transactions made on the day as well as information about the amount of cash inflow and cash outflow there that day.

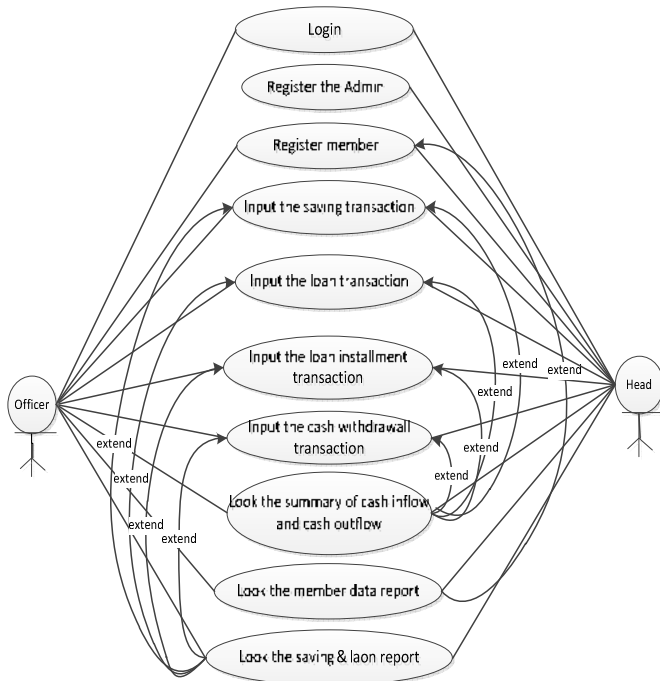

Fig. 4. Use Case Diagram

Activity Diagram describes the workflow or activity of a system or business process [13]. By using activity diagrams, workflow or process designed on the system in Cempaka Cooperative. There are several work processes on the system i.e. login, admin registration, member registration, savings transaction, loan transaction, loan installment transaction, cash withdrawal transaction, incoming and outgoing cash sum,

member data report, and savings and loan report. Activity Diagram of Deposit Transactions may be dumped on Figure 5.

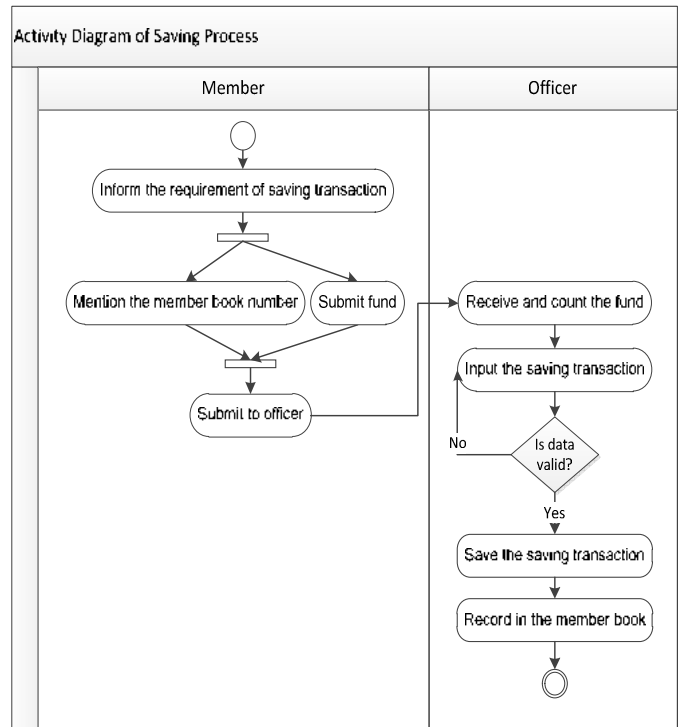

Fig. 5. Activity Diagram of Saving Process

E. Database Design

Database design is divided into 3 levels: conceptual level using Entity Relationship Diagram (ERD), logic level using Class Diagram, and physical level using Table Structure. ERD is described in Figure 6 and Class Diagram is depicted in Figure 7.

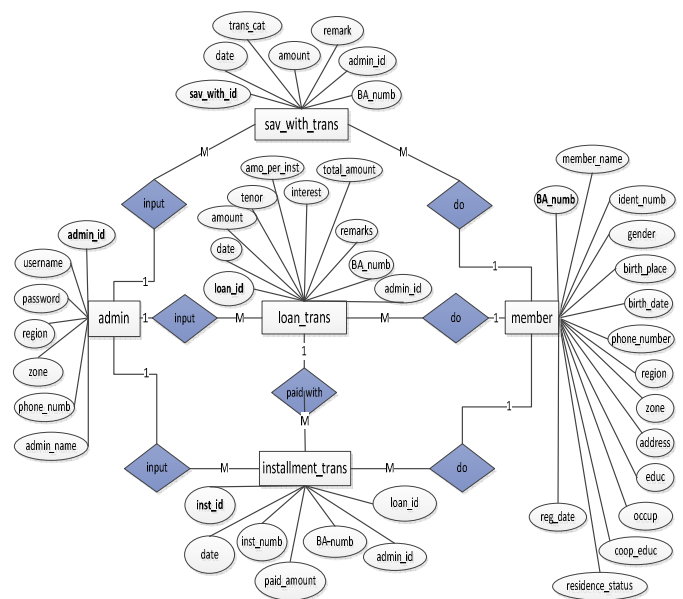

Fig. 6. Entity Relationship Diagram

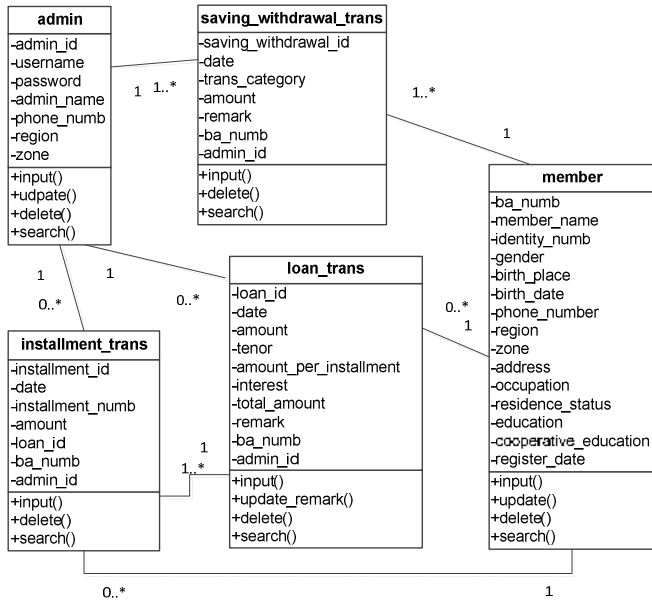

Fig. 7. Class Diagram

No more than 3 levels of headings should be used. All headings must be in 10pt font. Every word in a heading must be capitalized except for short minor words as listed in Section III-B.

F. Interface Design

Interface design is built using Pencil Project application. Designed interface for the system is the main page and login design, homepage, members, member registration form, saving transaction, savings transaction input, loan transaction, loan transaction input, cash withdrawal transaction, cash withdrawal transaction input, loan installment transaction, installment transaction, member data report, savings and loan report in pdf, savings and loan report in Microsoft Excel, summary of cash inflow and cash outflow. Figure 8 is the interface design for saving transactions.

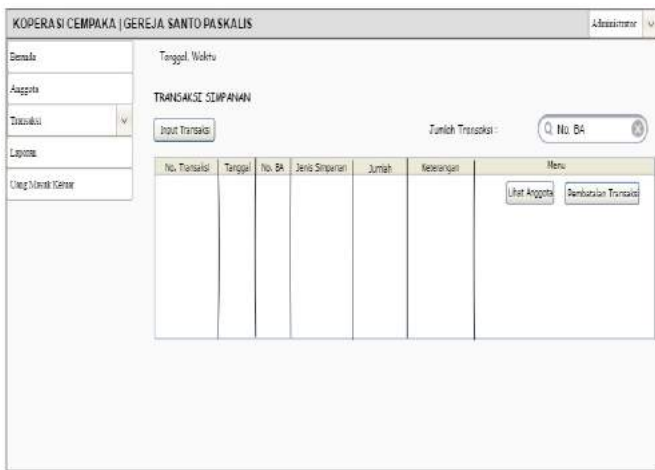

Fig. 8. Interface Design untuk Transaksi Simpanan

G. System Encoding Results

Some examples of system encoding results can be seen in Figure 9 for login interfaces, Figure 10 for the transaction interfaces stored, and Figure 11 for the data report saving and loan interface in PDF form. Login interface is the main page of the application. This page serves as an entrance for officers and heads of cooperatives to use applications. Login is done by entering username and password. The transaction interaction of deposits contains all transactions that have been performed or stored on the system. At the top left of the table there is a menu to perform input transactions, at the top right of the table provided features to search transactions and displayed information on the number of transactions available. On each transaction line is provided menu to cancel the transaction. Also provided menu to view details of data members who make transactions because the table only inform BA number of members who make the transaction. Interface of savings and loan data report in pdf format contains information about total deposits and residual loan of each member based on period from start of cooperative stand up to date selected in PDF form.

H. System Test Results

The system was tested using black box testing. The result of system testing is for login function, admin data, member data, savings transaction, loan installment transaction, cash withdrawal transaction, sum of money entry and exit, member data report, and savings and loan report, all can run as planned.

V. CONCLUSIONS

After conducting research and development of savings and loan information system at Cempaka Cooperative web based can be concluded that (1) system can be built with prototype development method with stages of analysis, designing, coding, testing and implementation; (2) The system can be used to manage member data, savings transactions, loan transactions, cash withdrawal transactions, and loan installment transactions and generate sums of entry and exit money, member data reports, and savings and credit reports.
